**Middle Neck Road and East Shore Road Corridor Study
and Proposed Zoning Amendments
Part 1 – Full Environmental Assessment Form**

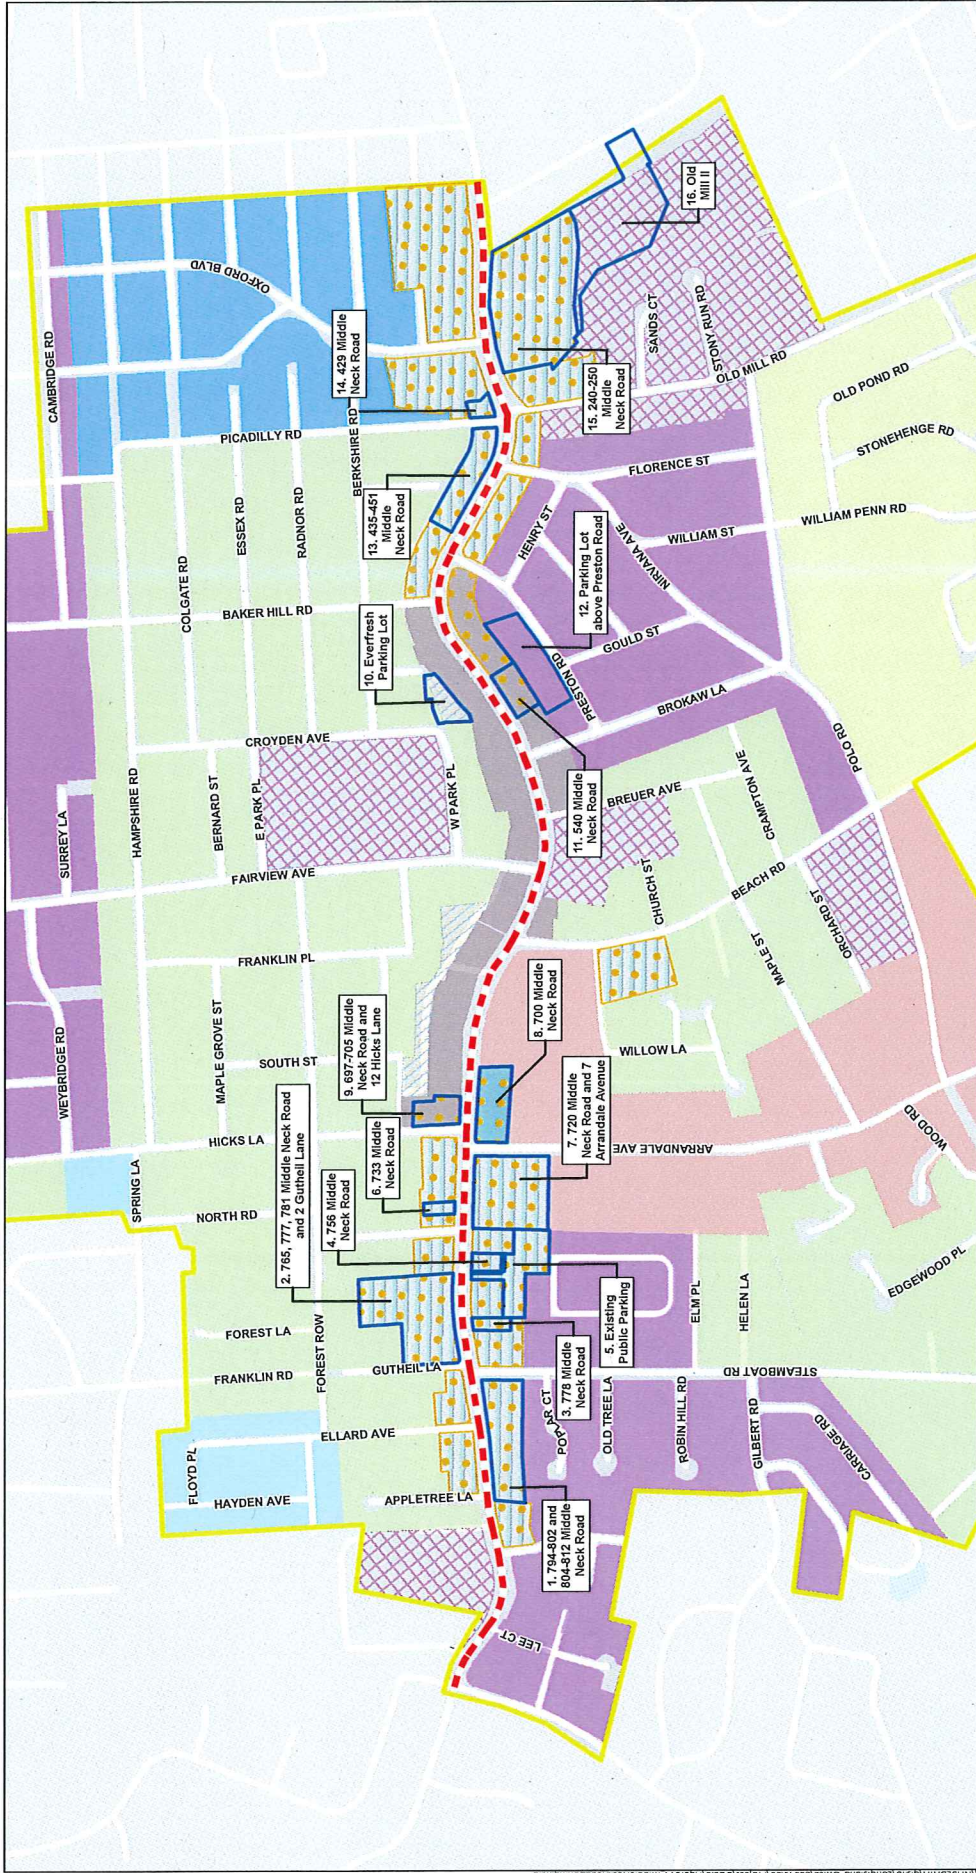

Attachment

Page 1, Item A. – Brief Description of Proposed Action:

As indicated, in addition to adoption of the Corridor Study, the proposed action includes adoption of zoning amendments, which are summarized as follows:

- › Re-naming the Middle Neck Road Multifamily Incentive Overlay (MNR-MIO) District the Corridor Incentive Overlay (CIO) District and expanding the boundaries of the CIO District southward to cover the area along Middle Neck Road to include the western portion of the property at 720 Middle Neck Road/7 Arrandale Avenue, the properties at 700 Middle Neck Road and 697-705 Middle Neck Road/12 Hicks Lane, northward along the west side of Middle Neck Road up to the northern boundary of the property at 540 Middle Neck Road, and to include the Mixed-Use and Waterfront Development Districts along the East Shore Road (ESR) Corridor (excluding the property at 236 East Shore Road)
- › Changing the zoning of the western portion of the property at 720 Middle Neck Road/7 Arrandale Avenue from Residence AA to Residence E.
- › Changing the zoning of the property at 265 East Shore Road/53 Vista Hill Road to Mixed-Use
- › Allowing within the CIO District “any commercial, Affordable Workforce Housing, or Assisted Living purpose when identified by the Board of Trustees as a community benefit/amenity in a particular circumstance.”
- › Defining as amenities which are presumptively beneficial to the Corridor neighborhoods and/or the Village as a whole: “Affordable Workforce Housing;” “Assisted Living with a permitted density of 75 assisted living units per acre, unless otherwise granted by the Board on a case by case basis;” “ground-floor commercial development;” “Public Amenities, such as uses or structures which provide and/or improve public access to the Corridor Incentive Overlay District;” and “any other similar opportunity which the Board of Trustees determines to be beneficial to the Corridor neighborhood(s) and/or the Village as a whole.”
- › Removing from the Zoning Code (§ 575-287.A) the restriction against the Board of Trustees authorizing a prohibited use within the underlying district as an incentive.
- › Adding “Assisted Living,” as defined in 10 NYCRR Part 1001, as a permitted use in Mixed-Use Districts.
- › Limiting the maximum building height granted as an incentive for Affordable Workforce Housing or Assisted Living to “five stories or 52.5 feet with an area on the roof for recreational use by the tenants of the dwelling.”
- › Providing for the relaxation of parking requirements for properties adjacent to Middle Neck Road, to be determined on a case-by-case basis and favored by the Board when infrastructure-oriented improvements (e.g., sidewalks, benches, park improvements, traffic calming measures, investment in electrical shuttle bus service, or car sharing service), assisted living, ground floor commercial, or any such similar improvement is proposed as a community amenity. The parking relaxations would not be granted for properties adjacent to East Shore Road without showing a substantial hardship and minimal adverse impact to the parking then available in the vicinity.
- › Requiring all applications for incentive zoning bonuses to be subject to a noticed public hearing.

The proposed zoning amendments along the Middle Neck Road and East Shore Road corridors are depicted in the attached maps.

Full Environmental Assessment Form
Part 2 - Identification of Potential Project Impacts

Agency Use Only [If applicable]
 Project: V. Great Neck Corridor Study/Zoning
 Date: 12/18/2018

Part 2 is to be completed by the lead agency. Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency and the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

Tips for completing Part 2:

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer "Yes" to a numbered question, please complete all the questions that follow in that section.
- If you answer "No" to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box "Moderate to large impact may occur."
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the "whole action".
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

Full Environmental Assessment Form
Part 3 - Evaluation of the Magnitude and Importance of Project Impacts
and
Determination of Significance

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

Reasons Supporting This Determination:

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

Additional development prompted by the proposed zoning amendments has the potential to result in the following impacts:

Soil and Topography – disturbance of soils and topographic features

Water Resources – additional stormwater generation from expanded areas of impervious surfaces, and associated impacts related to existing stormwater infrastructure and discharges, particularly to Manhasset Bay from properties along the East Shore Road corridor

Ecology – impacts related to stormwater discharges and other effects of development along the East Shore Road corridor

Land Use and Zoning – change in the land use pattern in the two corridor areas

Traffic and Parking – additional trip generation and associated impacts on the operation of the local roadway system; and increased demand on local parking resources

Air Quality – increased traffic-generated air emissions

Noise – increased traffic-generated noise

Socioeconomics – increased population in the two corridor areas

Community Facilities and Services – increased demand on community facilities and services due to increased population in the two corridor areas

Aesthetics – changes to the visual character of the two corridor areas

Cultural Resources – increased land disturbance and associated impacts on historical and archaeological resources

Determination of Significance - Type 1 and Unlisted Actions

SEQR Status: Type 1 Unlisted

Identify portions of EAF completed for this Project: Part 1 Part 2 Part 3

Upon review of the information recorded on this EAF, as noted, plus this additional support information
Middle Neck Road and East Shore Road Corridor Study (November 2018)

and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the
Board of Trustees of the Village of Great Neck as lead agency that:

A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.

B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.d).

C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.
