7. Evaluating Progress Toward Measurable Goals MCM 4

Use this page to report on your progress and project plans toward achieving measurable goals identified in your Stormwater Management Program Plan (SWMPP), including requirements in Part III.C.1. Submit additional pages as needed.

A. Briefly summarize the Measurable Goal identified in the SWMPP in this reporting period.

The greater majority of development projects within the Village disturb significantly less than one acre, because the Village is a fairly dense, urbanized area with small sized lots. The Village requires a SWPPP for any site with land disturbance activities of 1/2 acre or more. This usually results in few, if any, SWPPPs in a typical year, due to the prevailing small lot sizes within the Village.

B. Briefly summarize the observations that indicated the overall effectiveness of this Measurable Goal.

All site plans are reviewed and approved by either the Planning Board or the Zoning Board of Appeals and referred to the Village Engineer for review and comments. No projects with a SWPPP were approved with a proposed land disturbance in excess of one (1) acre.

C. How many times was this observation measured or evaluated in this reporting period?

0	0	0	0
---	---	---	---

(ex.: samples/participants/events)

D. Has your MS4 made progress toward this measurable goal during this reporting period?

Yes No

E. Is your MS4 on schedule to meet the deadline set forth in the SWMPP?

Yes No

F. Briefly summarize the stormwater activities planned to meet the goals of this MCM during the next reporting cycle (including an implementation schedule).

To continue to assure that SWPPPs are prepared, reviewed and approved on sites where land disturbance activities of 1.0 acre or more are proposed. This process is an on-going effort.

6. Evaluating Progress Toward Measurable Goals MCM 5

Use this page to report on your progress and project plans toward achieving measurable goals identified in your Stormwater Management Program Plan (SWMPP), including requirements in Part III.C.1. Submit additional pages as needed.

A. Briefly summarize the Measurable Goal identified in the SWMPP in this reporting period.

To continue to monitor new and redevelopment projects which result in land disturbance activities to assure that they meet the requirement of the Village Code with respect to stormwater run off, erosion control and submission of SWPPPs, when the site disturbance is greater than 1/2 acre. The Village will consider the possibility of implementing green infrastructure principles for new development.

B. Briefly summarize the observations that indicated the overall effectiveness of this Measurable Goal.

The goal of minimizing site runoff from new and redevelopment projects is enforced by site plan reviews conducted by the Planning Board and Zoning Board of Appeals, both of which utilize the Village Engineer to review site plans and assure the containment and disposal of all stormwater runoff on-site. In addition, the Building Department conducts inspections of sites to ensure compliance with approved site plans through routine inspections. The Village did not implement green principles for new development.

C. How many times was this observation measured or evaluated in this reporting period?

For each operation/facility indicate whether the operation/facility has been addressed in the MS4's/Coalition's Stormwater Management Program(SWMP) Plan and whether a self-assessment has been performed during the reporting period. A self-assessment is performed to: 1) determine the sources of pollutants potentially generated by the permittee's operations and facilities; 2) evaluate the effectiveness of existing programs and 3) identify the municipal operations and facilities that will be addressed by the pollution prevention and good housekeeping program, if it's not done already.
